

Waters that wash, rivers that carry: Citizen Science – Water guardians

Date: 20/03/2024

Water is essential for all living beings, and its maintenance is vital. Therefore, working in an interdisciplinary way, at school and within the community, is critical. Thus, undergraduate/postgraduate students in Geography – UNEMAT and elementary school students will carry out, on March 20, 2024, through the Laboratório de Pesquisa e Estudos em Geomorfologia Fluvial – LAPEGEOF, Secretaria Municipal do Meio Ambiente and Escola Municipal Erenice Simao Alvarenga, the planting of seedlings on the banks of urban streams in Cáceres, with the installation of identification plates, and guidance on trash issues.

**Join this initiative to
 celebrate World Water
 Day!**

**The vegetation on
 the banks of rivers
 protects their
 waters!**

**Protect yourself from the
 sun (hat and sunscreen)**
